**Share Class: GS4**

**NASDAQ Ticker Symbol: GMFZX**

**CUSIP Number: 40171W264**

**Inception Date: 12/29/2006**

**Potential Risk / Reward**

**Investment Objective:** The fund seeks capital appreciation and current income consistent with its asset allocation.

**Investment Strategy:** The fund, through investments in the Select Funds, is managed to a retirement date of year 2045 by adjusting the percentage of fixed income securities and equity securities to become more conservative each year until reaching the retirement year and then approximately 15 years thereafter.

**Investment Suitability:** This fund may be suitable for investors who want a simplified "one fund" retirement solution, are willing to pay slightly higher fees to get a diversified mix of investments that becomes more conservative over time<sup>†</sup>, and plan to retire at an age that is near the year 2045. The Funds' value will fluctuate due to changes in interest rates. There is a risk that the issuer of a fixed-income investment may fail to pay interest or even principal due in a timely manner or at all. The Funds' value will fluctuate due to business developments concerning a particular issuer, industry or country, as well as general market and economic conditions. The Funds are subject to risks presented by investments in foreign issuers and changes in currency exchange rates relative to the U.S. dollar may negatively affect the values of foreign investments held by the Select Funds. By investing in this Fund, you will incur the expenses of the Fund, in addition to the those of the underlying Select Funds.

<b>Fund</b>	30.71%	-40.29%	4.46%

The performance data quoted represents past performance and does not guarantee future results. Current performance may be lower or higher. Performance data current to the most recent month-end may be obtained at [www.GuideStoneFunds.org](http://www.GuideStoneFunds.org). The investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Year 2006 annual performance began 12/29/2006.

### FEES AND EXPENSES (annualized)

	Gross Expense Ratio <sup>†</sup>	Net Expense Ratio <sup>**</sup>
<b>Annual Operating Expenses</b>	1.39%	1.18%

<sup>†</sup> The Fund attempts to achieve its objective by investing in the GuideStone Select Funds. The fund is managed to a retirement date ("target date") by adjusting the percentage of fixed income securities and equity securities to become more conservative each year until reaching the retirement year and then approximately 15 years thereafter. The target date in the name of the fund is the approximate date when an investor plans to start withdrawing money. By investing in the Fund you will also incur the expenses and risks of the underlying Select Funds. The principal risks of the Funds will change depending on the asset mix of the Select Funds in which they invest. You may directly invest in the Select Funds. The Funds' value will go up and down in response to changes in the share prices of the investments that they own. The amount invested in the Fund is not guaranteed to increase, is not guaranteed against loss, nor is the amount of the original investment guaranteed at the target date. It is possible to lose money by investing in the Fund.

<sup>\*\*</sup> Reflects fee waivers and expense reimbursements by the investment advisor. This waiver and reimbursement arrangement, if not extended, will end on April 30, 2011.

<sup>1</sup> The performance quoted reflects fee waivers in effect, and would have been lower in their absence. All figures shown represent total return, except for those identified as yield. Total return is based on net change in NAV with reinvestment of all distributions. Returns for periods less than one year are aggregate and for periods greater than one year are annualized. Unlike a mutual fund, the performance of an index assumes no taxes, transaction costs, management fees or other expenses.

<sup>2</sup> The Lipper Rankings are calculated by Lipper Inc., a Reuters Company, which is a nationally recognized organization that compares the performance of mutual funds within a universe of funds having similar investment objectives. Rankings are based on total return performance: with capital gains and dividends reinvested, with annual operating expenses deducted, but without including front- or back-end sales charges.

Past rankings are no guarantee of future rankings. Rankings are relative to a peer group and do not necessarily mean that the fund had high total returns. Visit [www.GuideStoneFunds.org](http://www.GuideStoneFunds.org) for the latest month-end ranking and ratings.

<sup>3</sup> For each fund with at least a three-year history, a Morningstar Rating is based on a Morningstar risk-adjusted return measure that accounts for variation in a fund's monthly historical performance (reflecting sales charges and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. Within each asset class, the top 10%, the next 22.5%, 35%, 22.5%, and the bottom 10% receive 5, 4, 3, 2 or 1 star, respectively. Each fund is rated exclusively against U.S. domiciled funds. The Overall Morningstar Rating™ is based on the weighted average of the number of stars assigned to the fund's applicable time periods. The 5-yr. rating accounts for 60% and the 3-yr. rating for 40%.

<sup>4</sup> Portfolio composition subject to change at any time.

**Standard deviation** — A statistical measurement of distribution around an average, which depicts how widely returns varied over a certain period of time. Investors use the standard deviation of historical performance to try to predict the most likely range of returns. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility and greater risk.

**R-squared** — Shows the percentage of a fund's performance that is explained by movement in the benchmark index. This shows the correlation between the fund and its benchmark. An R-squared of 100% indicates that all movements of a fund can be explained by movements in the benchmark. A low R-squared indicates that very few of the fund's movements can be explained by movements in its benchmark. An R-squared measure of 50%, for example, means that only 50% of the fund's movements can be explained by movements in the benchmark index.

**Beta vs. S&P 500® Index** — Beta is a measure of a fund's sensitivity to market movements as defined by the S&P 500®. A fund with a higher beta relative to the S&P 500® is more volatile than the S&P 500®, and a fund with a lower beta relative to the S&P 500® can be expected to rise and fall more slowly than the S&P 500®.
